Annus Mirabilis:

Being an Ephemeridis.

LMANACK

the Year of our Redemption, 1688.

from the Creation of the World, according to the best of History, 5637.

Being Bissextile, or Leap-year.

h is contained things suitable for such a Work; As ses, Conjunctions, Meteorological Observations, ions, and other Configurations of the wandring ; together with the Diurnal Motion of the Planets. a Table of Houses more correct and demonstrable those commonly used: With three Examples of vities, that shew the Imperfection of the common ology, and its Professors.

Calculated for the Meridian of *London*.

ose { Latitude / Longitude } is { 51 / 24 } deg. { 32 / 20 } Minutes.

By J. PARTRIDGE
Student in Physick and Astrology.

Diversos diversa Juvant, non omnia Cunctos.

NDON: Printed by R. R. for the
mpany of STATIONERS.

To the Students and Professors of Astrology, to its Friends and Enemies.

Gentlemen,

THE Art of *Astrology* is known to many by its N but more especially to two sorts of People those are its known and publick Enemies, a pretended Friends and Professors; And both of the the most part *very Ignorant* of the Art, and unacqu therewith, but of the two, its Enemies most, taking Prejudice against it, either upon bare report of o or some Apprehensions of their own, not knowin tittle of it by Experience, having just sence and skill e to call it in print, either a vain or a damnable Art; for all this, I am apt to believe, that its ignorant P sors have done it more injury than open and pu Enemies; for these have nothing to alledg again but what their *Malice* and their *Ignorance* them; but the others, by pretending to be M therein, expose themselves and the art they preten by their *foolish* and *groundless Predictions*. And *boldly say* this, That there is but a very few that do u stand the grounds of *Astrology*, according to the given by the Authors in being, nor shall they do any thing Worthy or Memorable, by the *As* now in use; it being wholly vitiated and depra the new Inventions of *Ingenious Men*, [as they call and nothing at all like the old *primitive Astrology*. now they only know the name of *Ptolomy*, but n word of his *Principles* or *Practice*, both which mu understood before they pretend to call themselves *A gers*; and before they learn that, they must *learn* to *fo* great part of the stuff they now make a noise about. W do you find that the great *Ptolomey* takes notice of H in Directions, and that they receive their Proper

Qu

ality from the Houſe they fall in? Or where doth he
mention that the Lord of the Eighth, hath more
wer to kill, than the Lord of the Tenth or Aſcendant?
what *wiſe Man*, that will make Reaſon his Judg, will
r believe that a *Star* is made *Maleſick*, when a part
the *Zodiack* aſſigned to him for his Houſe, doth poſſeſs
t part of Heaven, called the *Eighth Houſe*, both which
but *Imaginary*; nay, tho *Jupiter*, who is the only *Ro-*
aive among the Stars, and the only Friend to Mankind,
oo, when he happens to be *Lord* of the *Eighth*, he muſt
by his Nature, forget that he is *Jupiter*; and as he is
d of the *eighth*, he muſt do his *Duty*, *Kill*, tho it be his
Friend: On the other hand, *Saturn*, if he happen to
Lord of the *Aſcendent*, he [forſooth] *cannot Kill*, and
Reaſon they give, is, becauſe he will not hurt his
n, [as they call it] that is, they make him perſonate
Native, of whoſe Horoſcope he is Lord of, forgetting
the extreams of *Heat* and *Cold* deſtroys Life; or to
ak like a *Chymiſt*, the Quality and Degree of Fermen-
ions. So likewiſe their *Alchocoden*, a Man or Child,
t live to ſuch a Number of Years, as the *Hiley* or *Al-*
coden, by his ſtrength ſhall allow, and this is one of
Reaſons that they often predict 60 *Years* of Life to
Child that dies within a year; *and as ſoon as it is*
ad then they immediately ſee the *Reaſon* for it; ſome
are or *Oppoſition* of *Jupiter* or *Venus*, ſome *Tranſit*, or
haps an *Eclipſe*, tho it is 10 or 12 *Degrees* diſtance
m the place that it Vitiates. But I ſhall ſhortly take
re that the World ſhall have further account of them,
their Practices, when I come to examine what Nati-
ies they have Printed. In the mean time I am yours.

J. P.

A true Table of Essential Dignities.

					Ext.		

This Table ſhews the latitude of the [illegible] *to every 2d degree of her diſtance fr*[illegible] *the ☊ or ☋, even to her greateſt L*[illegible]*titude, which is in the* Extream, [illegible] *utmoſt diſtance from either ☊ or ☋,* [illegible] *is three ſigns.*

The degrees deſcending in the left ha[illegible] *collumn, are of her departure from the* [illegible] *or ☋; but the deg. aſcending in* [illegible] *right hand column are her departure fr*[illegible] *the extream,* &c.

Therefore enter this Table with the [illegible] *diſtance from either of the Nodes, in* [illegible] *left hand column, and if it is under 30* [illegible] *the 2d column gives her Latit. if ab*[illegible] *30 d. the 3d, but if above 60 d. the 4*[illegible] Example, March *the 1ſt at Noon t*[illegible] *preſent year, the ☽ diſt. from ☊ is 2* [illegible] *15 deg. which in this Table gives 4 d*[illegible] *50 min.* North Lat. *&c.*

Of the four Quarters of the Year; and first of the Spring.

THE Spring Quarter begins, Aſtronomically and Aſt logically, when the *Sun* toucheth the firſt ſcruple of *Ar* and that is this year 1688, the ninth day of *March*, at 3 hours 44 minutes and 36 ſeconds Afternoon, *per Tab. rolin.* at which time the ſixth degree of ♍ aſcends in the E and the 28*th* degree of ♉ culminates on the M. C. and *M* near it: *Saturn* is in 23 deg. of *Libra*, *Jupiter* in 22 deg *Capricorn*, *Venus* is in 18 deg. of *Aquary*; *Mercury* is in deg. of *Aries*, and the *Moon* in 28 deg of *Libra*; in this der and diſpoſition do the Heavens behold the Earth at the t of this Ingreſs. Now that which makes this Revolution more conſiderable and remarkable, is, the Square of *Sat* and *Jupiter* from Cardinal Signs, and *Saturn* every way ſtro eſt; but chiefly by being in Conjunction with the *Virgins Sp* but the Effect of this will not be ſeen nor perceived till *J* following, and a little after: when they both make their ſec Square, and when *Mars* comes to the place of the laſt g Conjunction in the Month of *October*, 1682. then will Effects of this Ingreſs begin to ſhew themſelves.

Of the Summer Quarter.

THE Summer Quarter takes its beginning at that mom when the *Sun* toucheth the firſt ſcruple of *Cancer*, and t is this preſent year, the tenth day of *June*, at 5 hours and 5 nutes P. M. or Afternoon: at which time 23 degrees of Coeleſtial Sign *Scorpio* poſſeſſeth the Horizon, and 15 deg. of the Mid-heaven, and at this time there are four of the ſeven in Cardinal Signs, and ☿ alſo juſt entring *Cancer*. But the o remarkable thing in this Poſition, is, the ſquare of *Saturn* *Mars* from *Cancer* and *Libra*, and the Oppoſition of *Mars* *Jupiter* from *Cancer* and *Capricorn*, and *Saturns* being ſta

n

y at the time of the Ingreſs, and two or three days before in poſition to a giver of Life in ♈ ; and *Mars* alſo in a mun- e Square to it, and a Zodiacal Parallel likewiſe, which in- d is an untoward Poſition These great ſtars being in Car- nal Signs, and among and with remarkable fixed Stars alſo : ould give ſtrange and various VVeather, ſubject to Heat and orms, and ſuch Storms as are not uſual.

Of the Autumnal Quarter.

THE Autumnal Quarter begins when the *Sun* enters the firſt Confines of the Sign *Libra*, and that is this year on *ptember* the 12*th*, at 6 hours and 36 minutes in the Morn- g; at which time 8 deg of *Cancer* is on the Mid-heaven, and deg. of *Libra* aſcending; and the moſt remakable Poſition rein is, the *Sun* and *Saturn* in *Libra*, and *Mars* ſuddenly en- ing into that Sign, and will ſhew their Effects about *the* 9*th* October, *when the Sun doth approach the Body of Saturn*, d *Mars then about the* 11*th deg. of Libra alſo*: Such Poſitions ually give Storms and Tempeſts both by Sea and Land, *&c.*

Of the Winter Quarter.

THE Winter Quarter begins when the *Sun* enters on the firſt ſcruple of the Sign ♑, and that is, by the *Carol. Tab.* oreſaid, this preſent Year *Decemb.* 10. at 7 hours 57 min. P.M. this Ingreſs ♄ is entred ♏, and ♃ is entred into ♒: in the mpaſs of theſe three Months, and under the Influence of this greſs ♄ and ♃ make their third Square from 5 deg. and odd inutes of ♏ and ♒: both fixed and violent Signs, and ♃ haſtening to the ☌ of the laſt great ☌ in the Sign ♌, wh ich e doth perfect about the middle of *February* following. What ill be the Effects of theſe things the next Year will ſhew, and me Years following: for as Motion begets Effects, ſo Time uſt be the Interpreter. And ſo I come to ſpeak of the Eclipſes the two great Luminaries.

Of the Eccliples in the Year 1688.

There will be four Eclipses this Year, two of the *Moon*, as many of the *Sun*, but noon of them perfectly visible the Inhabitants of *London* and *England*, by reason some of the wholly, and the rest partly are under the Earth.

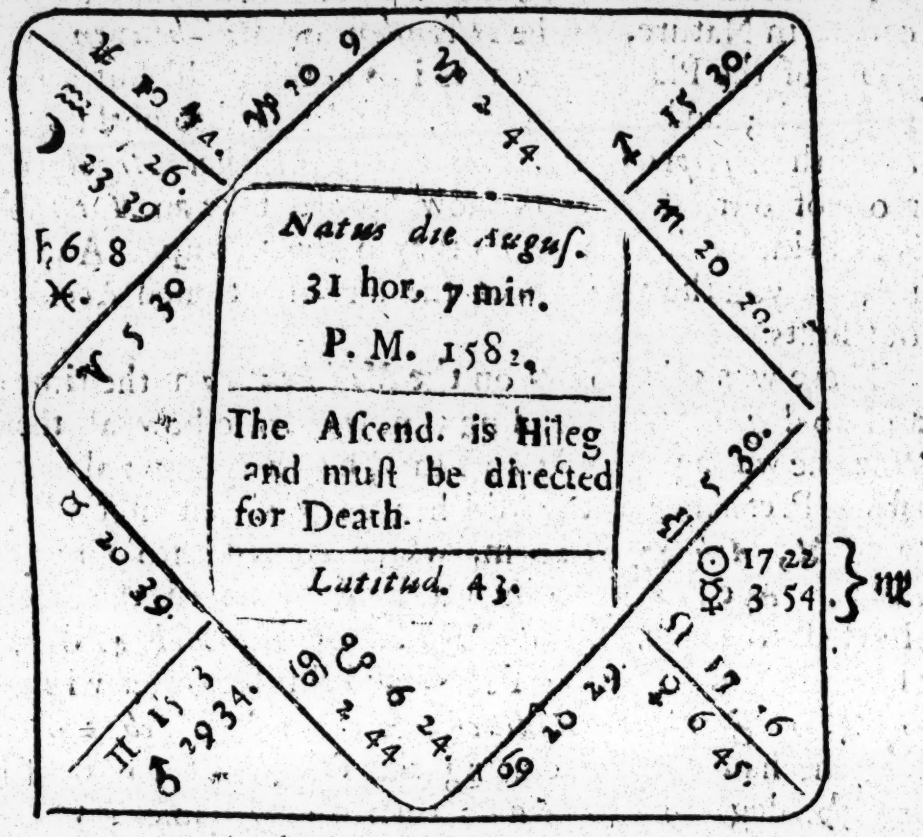
The first is an Eclipse of the *Moon*, *April* the 5*th*, about six the Clock in the Evening.

The second is of the *Sun*, *April* the 20*th*, about two of Clock in the Morning, and therefore invisible.

The third is of the *Moon*, about Ten in the Morning, on 19*th* day of *September*.

And the fourth is of the *Sun*, on the 14*th* day of *October Sun* rising, which will be a famous and remarkable Eclipse, it happens in the second deg. of ♏, and if any of it, it will be ly the latter part of it can be seen at *London* if the Air be cle And so I come to present you with two or three Nativities out *Argol de diebus criticis*, to shew *his* Ignorance in Astrology, the Rashness of *his Followers*, who so willingly follow *his Err* contrary *to Reason*, and the *Ancient and Primitive Rule* that *worthy Inquiry*, which if one Prediction of theirs twenty prove true, it is more than probable, because they spe more time in Innovations and Whims, than in studying the t and demonstrable Rules thereof, and this even among those t call themselves Masters and Teachers of Astrology, taking pa to prove and shew the World when People are *dead*, what rection they died by Astrologically; by which means the Stud are led farther into Error, because those Directions will not h good in another Nativity, but deceive any Man that shall p upon them in his Judgment; and this I shall presently pro from their own words, when they will allow Death f out the ascendent to Antiscions, Terms, Sextiles, and fixed Star, wh the Aphetical Places pass by the Malistick Beams of ♄ and ♂, Nay, I will go further, there are some in *England* that pret both themselves to be great Astrologers, who have taken their o Childrens Nativities carefully, and these Children have died 2, 3, or 4 Years of Age without any Direction of Reason for as they think; [except Transits which does them great Serv

metimes] and yet these Men stand up highly for the Truth of strology. But I hasten to what I intend, in hopes to reprove e Ignorant, refute the Adversary, and instruct the Ingenious. nd the first is the Nativity of *Francis Vitellius*, Archbishop of hine, de dieb. Criti, *pag.* 336. Edit. ultim.



Argol says this Bishop died by a sudden defluxion of Humours on is Arms and Shoulders, which he calls a *Gout*, and retention f *Urine*, on the 26th of *February*, *Anno* 1646. being then aged 3 Years, and almost 6 Months. And the Direction he says he ied of, was the Ascendent to the *Antiscion* of ♂ in the first eg. of ♋: So that he out-lived the *Ascendent* to the Body of ♂, nd a Year after he died, when it was directed to the *Antiscion* f ♂: and this is jumbled together to make the *Mid-heaven* ome to the Body of ♃ in the Year 1622. when his Ecclesiasti- al Dignities were conferred on him, being then aged 40 Years, nd *he tells us also, that he was made Commissary General in ome affairs of his Trade* in the Year 1630. and this upon the Direction of the Ascendent to the Cusp of the third, *which, he ays, was irradiated by the Rays of the Sun, which those curious n this art may observe.* Precious Astrology!

Now

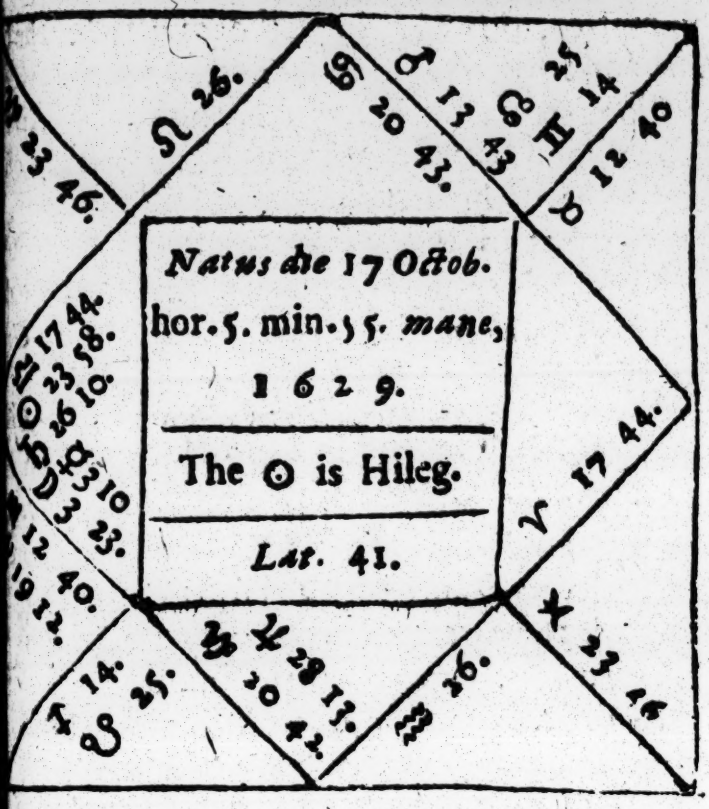
Now *Query*, If he died on ſuch a Direction as this Anti on, then how came he to eſcape the Aſcendent [in the co mu way] to the □ of the ☽, to the □ of ♄, to the □ of the and to the Body of ♂? Likewiſe the Moon-light of the time the ☌ of ♄, the ☍ of the ☉, the □ of ♂, and he Lord of eighth Houſe. But beſides all this, there is no ſuch Di ect can be in Nature, as the *Aſcendent* or *Mid-heaven* to the *An ſcions* of the Planets, becauſe it is nothing elſe but a Point in Ecliptick; and therefore it can be directed to nothing but a dy in the *Ecliptick* alſo; and indeed neither *Argol*, nor ma more of our Aſtrologers know how to take an *Antiſcion*, th is in Print by thoſe Authors they daily cry up. And ſo I co to gi e you the Reaſons of the fore-mentioned Accidents wi out ſhifts.

There was 5 deg. of ♍ on the *Mid-heaven* at the time of Bir and 10 deg. of ♈ aſcending; now obſer e how all theſe agr When he was ag d about 40 Years, he was honoured with Eccle aſtical Preferment, the Mid heaven was then directed to the B dy of ♃, *Ark* 37 d. 20 m. which turned into Time, gives Year. Aged 48 Years, he wa again preferred, the *Sun* was th directed to the Zodiacal Parallel of ♃, *Ark* 44 d g. 33 m which in Time gives 48 Years, and this followed with the *M* to a ✶ of ♂ in the *Zodiack*, Anno 1646. *Feb.* 26. When died, he had then, operating the Aſcendent to the □ of *Ark* 59. deg 39 min. which turned into Time, gives 63 Ye and a few days, and the Aſcend. and ☌ ♂, *Ark* 59 d. 56 m which turned into Time, gives 63 years and 3 Months, wh is as near as I would deſire a Direction to hit: For other thi give the Time. and both theſe Directions followed with t Aſcend. and □ ♄, which with the reſt give ſuch Diſeaſes theſe are, as you may ſee *Ptol. lib.* 4. *cap. de gen. mortu.* A ſo much for this Nativity.

Here followeth the Nativity of the Son of *Philip* the fou *King* of *Spain*, from *Argol* in his *De Diebus Criticis*, pag 10 *Edit. ultim.*

And this Prince, he ſays, died in *October* 1647. from t Direction of the *Aſcendent* to the *Body* of the *Moon*, Lady the eighth Houſe.

How he will prove the *Moon* Lady of the eighth Houſe I can te



Latit. Planetarum.

♄	2	17	*No.*
♃	0	45	*So.*
♂	0	42	*No.*
☿	0	15	*So.*
♀	0	25	*No.*
☽	3	53	*No.*

, unleſs by her being allowed by them an *Exaltation* in ♉, hat Sign upon the Cuſp of the eighth Houſe, but if they will ck ſo cloſe to their Table of Dignities, ſhe is more properly dy of the tenth; and ſo in their Language ſignifies the *Medi-*; but to ſay the truth, neither the one nor the other ſignifies ruſh in Direction; for let the *Moon*, or any other *Planet*, be rds or *Ladies* of the *tenth* or *eighth*, it doth not at all alter eir Nature, or make them one grain more Benefick, or Male- then they were before; but by this ſham they put upon the norant, and make them believe that when ♃ or ♀ is Lord or dy of the eighth, they do then kill by Direction, which is as e as that the *Aſcendent* to the Body of the *Moon* kills in this tivity.

But ſuppoſing it were true, that here the Aſcendent were *Hileg.* d that the *Moon* by Direction could kill, how came it to paſs at the Native did not die on the Aſcendent to the Body of the , the Body of ♄, and the □ of ♃, Lord of the ſixth in the th? I am ſure there is ſcarce any of them, but what would ve ſworn he would have died on thoſe Directions before they me up, tho it is quite contrary to the Rules of *Ptolomy*; and their own Authors on the Effects of Directions, and to Reaſon

it

it self; but it is no matter, this will do well enough, by the h of a *bad Revolution* and two or three *bad Transits* to kill twe and by their perswasion, to make forty Fools believe it. And you that do not understand Latin, I would not advise you learn it on purpose to read these *Astrological* fop Reasons, you may read the same sort in English without much Troub and less Profit. And so I come to give you the true Reas for this Princes Death, from the Principles of the Gr *Ptolomey*.

In this *Nativity* the *Sun* is *giver of Life*, as being in the *Asc dent* an *Aphetical* place, and must be directed for Death a for there is no Point, either of *Mid-heaven*, *Ascendent*, *Moon part of Fortune*, that can be allowed to kill by Direction the *Sun*, and therefore let us examine what Hostile Rays the meets with to agree with 18 years of Age, at which time this tive died: The *Sun* is at that time got into almost 8 deg. of by Direction, but there he meets with no Malefick Beams, no other in the common way; neither do I alter the *Horos* above 30 min. but take his own Figure, and the places of Planets in *Longitude* and *Latitude* as he hath there given th and to this very Time and Position doth the *Sun* come by rection to the *Mundane Parallel* of ♄, and that succeeded by *Mundane Parallel* of the *Moon* and ☿. The Oblique Ascen of the Ascendent is 201. 52. the *Sun* is distant from the Ho scope 8 deg. 30 min. and ♄ is distant 10 deg. 15 min. the of Direction hence emerging is 17 deg. 25 min which turned to Time, gives just 18 years, and this followed by the *Parallel* the *Moon* and ☿, which in any Nativity would kill, but espe ally in this which is so weak, and beyond all dispute, where th is no assistance to help and save.

Object. But methinks I hear some of you object and say, If t is true, why then did he not die on the Direction of the *Sun* the *Body* of ♄ at about two years of Age, or to the *Body* of t *Moon* and ☿, at about 9 years of Age? To this I answer, Th there are no Men that understand Astrology, who would ask doubt in a thing so plain; but because I know that I have so Men to deal with that do not understand it, I shall therefo give the Reason of it in words at large: First, he could not upon the ☉ *ad Corp* ♄, because the ☉ *ad* □♃ *in Zodiaco*, s ceeded it within 2 deg. *Ptol. lib.* 3. *c.* 14 *de modo Prorogation*

th

Rule is positive, and will not fail, as you have had an emi- and publick Example of late in the Nativity of a *French* *ionist*. Secondly, the Body of the *Moon* could not kill, be- e the *Moon* is not really of her self Malefick there, but prin- lly, because the *Sun* continues in a perfect Ray of ☌ *in mun-* for many years together by the *rapt motion*, and the Aspect ally compleated about 9 years of Age; therefore neither of e Directions could take place to kill; and indeed had it not for the prevailing Rays of ♃, according to my Sentiments e Rules of *Astrology* that I am acquainted with, this *Na-* could not have lived out the first year, so much is the *Sun* fled, and so weak the Nativity. And so I come to give you rd Example of a Nativity that hath hitherto been miserably gled, and that is,

The Nativity of *Marcus Antonius Columna Comes Tubilis Reg- Neapolis, in diebus Creti* pag. 246.

Lat.

Lat. Planet.

♄	0	3	South.	☉	14	South.	☿	1	38	South.
♃	0	25		♀	0		☽	1	9	North

Declinat. ☽ 22. 51. Declinat. of the ⊕ is 22. 51. and distance of the ⊕ from the true Mid-heaven is 19 deg. 46 min

This Nativity was publiſhed firſt by *Argol*, and he ſays the Natives true one, but how he corrects it he doth not men on; therefore I judg he did, as many of ours now a days do, w a Man is dead, they will certainly and eaſily find out ſo thing to kill him, tho [as they often do] they alter the time gi an hour, or an hour and half, and inſtead of correcting the Figu they confound it: and commonly leave it hard, it not impo ble afterward to correct, without the original Eſtimate Ti which they are ſo diſingenuous not to ſet down. As to my C rection of it, I cannot poſitively aſſert its Truth, becauſe of reaſon before-mentioned, but it is probably true; but as to Correction, and the Reaſons he gives for his Death, it is wh impoſſible, and contrary to the Fundamental Rules of *Aſtro gy*; as you may obſerve by the following Diſcourſe. And fi I do not propound the *pars Fortunæ* as *giver of Life*, accor to the Doctrine of *Ptolomy*, in his *quadri. lib.* 3. *cap.* 13. must be directed to give Death likewiſe, which was in the y 1584. when he was aged 49 years and 5 months, and as *A* tells it, this was the occaſion: He had for many years been *V* roy of *Sicily*, and was by his Maſter, the King of *Spain*, ca home in the year 1584. and in his Journey the was taken ſick the way near the City of *Medina Cœli*, on the *9th* of *July*, a in that City he died the *20th* of the ſame Month, of a contin al Fever. And for this our Author gives the *Aſcendent* to t □ of ♂, a *very likely Story!* but ſuppoſing the *Aſcendent* w *giver of Life*, the □ of ♂ came up at about 39 years age, it could not give ſo much as a two days Fever, much le kill; and this upon very good Authority, *Ptol. quad. lib.* 3. *ca* 14. *de modis Prorogationis*. But in this Point I will leave t Author, and come to my own Experience, *and challenge a Man* to bring a Nativity, whoſe *Hilog* is without diſpute own and allowed by us both, and the ſame directed to the ☌, □, ☍ of ♄ or ♂, ſo near in Conjunction with ♃ or ♀, that ev gave Death, and what is more [without any other Direction

Natur

tural Cause] Sickness; I am able to bring Proofs and Exam-
s to the contrary, and those in Nativities of very good Autho-
y for Truth. But I perceive *Argol* looks on this journey to
a sort of Honour and Preferment, which I do not, and there-
e he gives you another Reason to inforce his Opinion, and
s you, that he had at the same time, or a very little before it,
Ascendent to the Trine of the *Sun*, which besides the Rays
♃ would of it self have been able to preserve Life, and this
he brings to strengthen, is indeed an A gument against him
those that understand, and are not partial in the Point. And
I come to give you the Reasons for his Death, that to me seems
more plain and rational; but how others will judge thereof I
not tell, I suppose some of them bad enough: for there are
ots in Astrology as well as Religion, and those that have for
ong time believed Error, are at open variance with Truth, and
metimes hard to be reconciled to it, therefore let them perish in
ir Ignorance, *Qui vult decipi*, &c. The *pars Fortuna* is not
be dir.cted in the *Zodiack*, but *in Mundo*, and so it is here di-
ted, its *Right Ascension* is 115. 31. and its distance from
Mid-heaven is 19. 46. the Opposition of the *Sun* falls in al-
ost 18 deg. of ♍; and the distance of that Point from the
id-heaven is 168 40. the part proportional to be subtracted
27. 38 which subtracted from the primary distance of the Op-
sition of the *Sun* from the Mid-heaven, leaves the Ark of Di-
tion of the part of Fortune to the Opposition of the *Sun* 45
. 32 min. which turned into Time, gives 49 years and about
Months, and this about the same time is aggravated by the *Sun*,
condary to the □ of ♄, without any help or assistance, and may
rationally allowed to give Death, without shams or tricks.
ote, the Alteration I have made is above half an hour, for the
ght Ascension of the Mid-heaven in my Figure is 95. 50. and
degree of the Ecliptick agreeing thereunto, is 5 deg. 25 min.
♋, so that those who please may set the Figure.

Thus I have in three Examples given you the Method and
actice of our common Astrologers, their irregular Practice,
d groundless Predictions, from whence doth proceed, as from
true Cause, the neglect and Contempt of Astrology; and not-
hstanding the groundless Cause assigned, this very Nativity
h been printed three times, *i. e.* in *Argols de dieb. Criti*, his

Primum

Primum Mobile, and in English also: But I shall say no mo in this place, it being but to give you a sight of my design in m *Defectio Geniturarum.*
